*What do I ask a client with a history of...*

## **Alzheimer's Disease/Dementia**

Alzheimer's disease is a progressive degenerative disease of the brain that leads to dementia. Dementia is a significant loss of intellectual abilities such as memory capacity, severe enough to interfere with social or occupational functioning.

### Questions:

- How old is the client and when was he/she diagnosed with Alzheimer's disease or dementia?
- Were there any tests performed and what were the results?
- What was the cause of the dementia?
- Is the client capable of performing basic activities of daily living like washing, dressing, feeding, etc? Can he/she drive a car or manage his/her own finances?
- What medications is the client currently taking?
- Does the client live alone?
- Does the client have any other medical concerns?

**Once these questions are answered, please send an email or fax to me.  
I will respond within 24 hours.**
