What do I ask a client with a history of...

Asthma

Asthma is a common disorder in which chronic inflammation of the bronchial tubes makes them swell, narrowing the airways. Allergies, viral infections, environmental irritants, cold air and exercise frequently trigger it.

Questions:

- How old is the client and when was he/she diagnosed with asthma?
- Does the client currently smoke?
- What is the frequency and intensity of the symptoms?
- When was the client's last major attack and how was it treated?
- Has the client ever been hospitalized as a result of an asthma attack?
- What medications is the client currently taking? Does the client have a history of heart disease? Does the client have any other medical concerns?

**Once these questions are answered, please send an email or fax to me.
I will respond within 24 hours.**
