What do I ask a client with a history of...

Diabetes

Diabetes is the inadequate production or utilization of insulin.

Questions:

- How old is the client and when was he/she diagnosed with diabetes?
- What type of diabetes does the client have?
- What medications is the client currently taking?
- Has the client regularly visited his/her doctor for follow-up? Is the client's diabetes under control?
- Has the client made any lifestyle changes to help control the diabetes?
- Does the client have a history of high blood pressure or heart disease?
- Has the client had any kidney problems?
- Does the client have any other medical concerns?

**Once these questions are answered, please send an email or fax to me.
I will respond within 24 hours.**
