What do I ask a client with a history of...

Kidney Cancer

Most kidney cancers develop in the tissues that filter blood and produce urine.

Questions:

- How old is the client and when was he/she diagnosed with kidney cancer?
- Does the client smoke?
- What was the treatment for the cancer and when did it end?
- Has the client had any follow-up tests and what were the results?
- What stage was the cancer? What was the size, growth and location of the cancer?
- What medications is the client currently taking?
- Does the client have any other medical concerns?

**Once these questions are answered, please send an email or fax to me.
I will respond within 24 hours.**
