What do I ask a client with a history of...

Osteoporosis

Osteoporosis is an increase in the porosity of the bone, which causes the bone to soften.

Questions:

- When and how was the client diagnosed with osteoporosis?
- What is the cause of the osteoporosis?
- What is the treatment for the osteoporosis?
- What is the severity of symptoms? What is the frequency of fractures?
- What is the bone mineral density (BMD)?
- What is the extent of disability?
- What medications is the client currently taking?
- Does the client have any other medical concerns?

**Once these questions are answered, please send an email or fax to me.
I will respond within 24 hours.**
